

WE'RE DROOLING OVER THIS ART

New Year. New Art!

When children make art, they experience satisfaction and joy. Along with the pleasure of creating; children learn special skills that only the arts can offer. At Young Rembrandts, we specialize in developing your child's whole brain. Every session of art classes are filled with new lessons created by a team of educators to challenge and develop your child. It's a right brain activity taught using a left brain method - only found in the YR classroom.

If you haven't registered yet, there is still time!

MAKE AFTER-SCHOOL MATTER

Savvy Learning Starts Here

Young Rembrandts powers up both sides of the brain - we cross language barriers, we cross age groups, we push the limits of what a normal classroom can accomplish because we're integrating the right and left brain at the same time.
